

TrueWall System

Highest Standard Measurement Built Into One System

Why Use TrueWall?

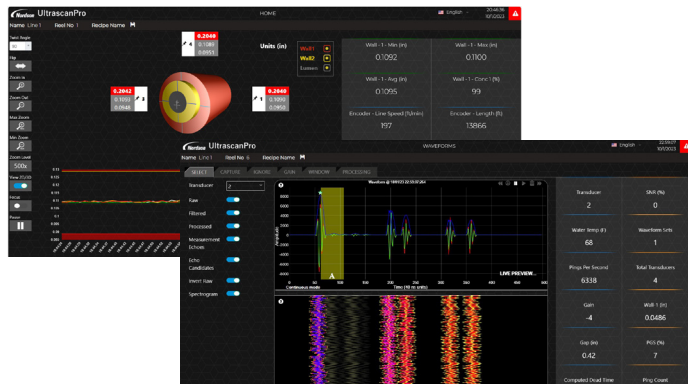

- Increase production efficiencies and reduce material cost
- Maximize productivity with simple-to-operate system
- Eliminate operator error with automatic set-up, search and tracking capabilities
- Product highest quality products
- Additional software options:
 - Diameter measurement
 - Wall thickness verification
- **NEW!** Built-in process monitoring

NEW! AI Wall Measurement Technology

Built-In Process Monitoring

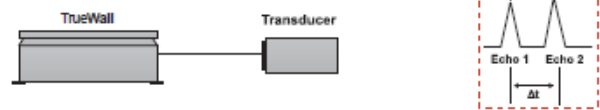

- **Intuitive:** No need for complex software training
- **Simplified Setup:** Reduced the time and resources needed to get your equipment up and running
- **Lower Costs:** Less operational expenses by elimination the need for additional hardware
- **Seamless Integration:** Works seamlessly with your existing equipment
- **Real-Time Quality Control:** Monitor critical measurements (centering, wall thickness, etc.) to reduce the risk of defects

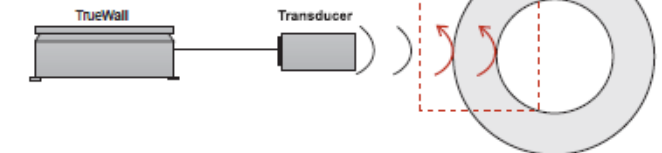

Auto-Search: TrueWall finds the echoes and sets a "window" around them.

Auto-Setup: TrueWall interprets the ultrasonic waveform and identifies the proper echoes.

Auto-Tracking: TrueWall locks onto the proper echoes and tracks them as the product moves.
